

Automation Engineer

Become part of an exciting, passionate and fast paced team. We are looking for a 'QC Test Automation Engineer' who is an outstanding team player with a positive attitude; a self-motivated professional with dynamic hands-on functional and automation QC testing experience. You will get to work with and learn some of the latest cutting edge technologies, in a growing business that's having a transforming impact within Global Validation Life Cycle Management.

At KNEAT, we cultivate a fun, self-organised, multi-disciplinary environment that nurtures individual growth, appreciates diversity, encourages initiative, values teamwork, shares success, and rewards excellence.

The Role

- Requires you to contribute towards the creation and maintenance of a quality test automation framework for a web application
- Create and drive the design of automation test cases from software requirements in conjunction with a functional understanding of the application under test
- Contribute to the production of test specifications
- Improve the CI process across teams
- Analyse results arising from test execution and accurately record test activities and tracking of defects
- Other tasks as assigned

What qualities will you bring

- 3-5 year's experience in using test automation tools for test execution against a web application such as, HP UFT (QTP) or Selenium.
- Expert in an OO programming language such as C# or Java.
- Proficient in testing techniques, utilizing test automation frameworks and processes, and have a strong knowledge on all phases of testing.
- Ability to use initiative and be willing to generate ideas to continuously refine testing processes to improve quality.
- Possess a strong technical aptitude with the ability to identify, analyse and solve problems.
- Experience with continuous integration tools

Skills

- Excellent verbal and written communication skills

Qualifications

- BSc in Computer Science or related field OR equivalent experience.
- ISTQB Certification is advantageous

Perks and Benefits

Our people are the most critical component of our long-term success and their health and wellbeing are our priority. You will enjoy a comprehensive, locally competitive benefits package.
