

Web Developer

We are seeking individuals who are self-motivated, team players who enjoy both technical and creative challenges within a fast-paced agile environment.

We work with the brightest and most talented people. We have a fun yet challenging work environment that is passionate about technology and creativity, and it will provide the successful candidate with the opportunity to use the most current technologies in a rapidly growing workforce.

The Role

- Requires you to contribute of the delivery of semantic, modular, best-in-class code using C#, HTML5, CSS3, JavaScript and more.
- To help to produce elegant, innovative solutions for complex technical and design issues.
- The aim being to provide the best possible service to customers.
- Have a strong emphasis of moving to a real-time web solution providing the best user experiences to our customers.
- Collaborate with cross-functional teams to define, design, and deliver new features as required.
- Continuously discover, evaluate, and implement new technologies to maximize development efficiency across the team.

What qualities will you bring

- Experienced in creating quality, maintainable, and highly usable web applications.
- Passionate about software development in any of its forms.
- At home in a team environment and work well with others.
- Dynamic, and a results-oriented problem solver.
- Excellent communication skills
- Good problem solver

Qualifications

Have a Bachelor's degree in Computer Science (or a related field) OR equivalent experience.
